Switch Always On AC Device

1x AC Power Cable

Quick Start

1 Connect AC Power

Plug the AC power cable into the Switch Always On AC unit, then into a reliable power source. Wait for the indicator light to turn green.
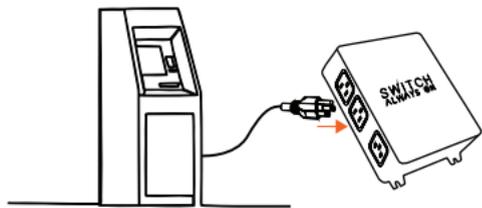

2 Connect to Network

Use the LAN/WAN Ethernet ports to connect to your local network and router.

3 Connect Your Devices

Plug in the devices you want to manage (e.g., modems, routers, payment terminals, printers) into the dual AC outlets. Make sure their power cables are securely connected.
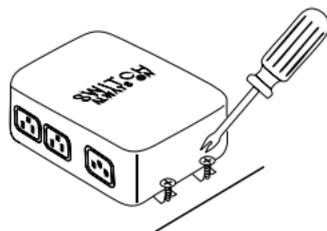

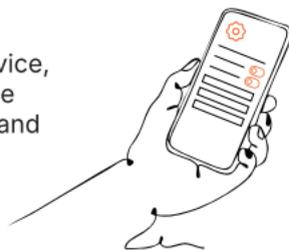

4 Download the App & Setup Your Account

Download the Switch Always On Cloud App from your app store or access it via desktop at www.switchalwayson.com.

- Create an account and follow the prompts to register and activate your SAO AC device.

5 Configure Device Settings

Use the app to name your device, set AC port voltages, schedule power control, enable alerts, and test reboots.

6 Mount the Device

If desired, use the device tabs to screw the device securely to a flat surface.
